

Super Style MKIII "Dynamic style"

Program: Pure wave – Freestyle
Sizes: 3.7 - 4.1 - 4.5 - 4.9 - 5.3 - 5.8 - 6.3 - 6.8

The SUPER STYLE MKIII has been re-designed with the help of wave specialist John Skye: based on great success of the 2009 and 2010 versions. The new SUPER STYLE MKIII is a sail designed to suit most worldwide wave sailing conditions and excels also in freestyle manoeuvres.

The SuperStyle MKIII features:

The new full X-ply body of the sail creates a great heavy-duty support to keep the shape in the right place on the whole sail, while the two lightweight monofilm windows contoured by a lightweight X-ply and insignia panels, allow to save some weight in the less stressed areas. This also creates a very new distinctive look that will make any Superstyle sail an easy –to-spot sail in the water. More power in the small sizes from 4.9 down, achieved through a longer boom, shorter mast and softer middle body. The full, powerful draft profile of SUPER STYLE will give you plenty of speed and control to get moving, carve hard, and jump high. Strong and lightweight, the new Superstyle MKIII is here to leave a track...

Model	Boom (cms)	Luff (cms)	Battens	Recom. Boom	Recom. Mast	Head
SuperStyle 3.7	145	367	5	Super Style 145-205	Vogue C75 370	Adjust.
Super Style 4.1	155	384	5	Super Style 145-205	Vogue C75 370	Adjust.
Super Style 4.5	158	407	5	Super Style 145-205	Vogue C75 400	Adjust.
Super Style 4.9	166	417	5	Super Style 145-205	Vogue C75 400	Fixed
SuperStyle 5.3	173	429	5	Super Style 145-205	Vogue C75 400	Fixed
Super Style 5.8	179	458	5	Super Style 145-205	Vogue C75 430	Fixed
Super Style 6.3	185	479	5	Super Style 160-220	Vogue C75 460	Fixed
Super Style 6.8	189	492	5	Super Style 160-220	Vogue C75 460	Fixed

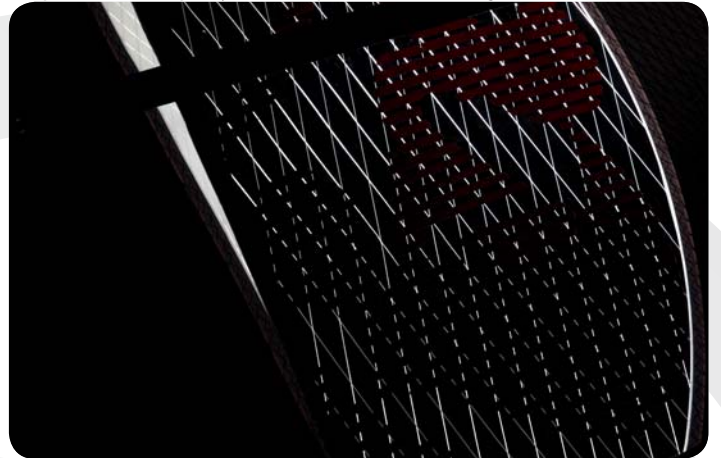

The new outline of the SuperStyle MKIII: slightly longer boom, shorter masts on sizes 4.9 and below. More low end power and control in gusty winds.

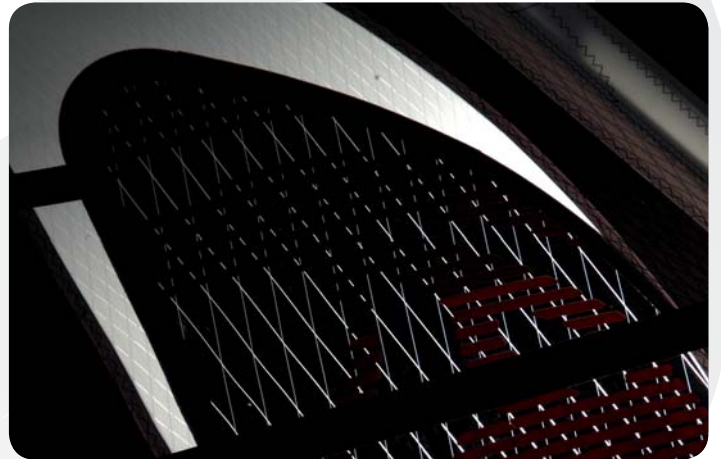

The perfect match: SuperStyle monocoque boom and RDM vogue mast.

The new x-ply head window, stronger construction, lighter weight.

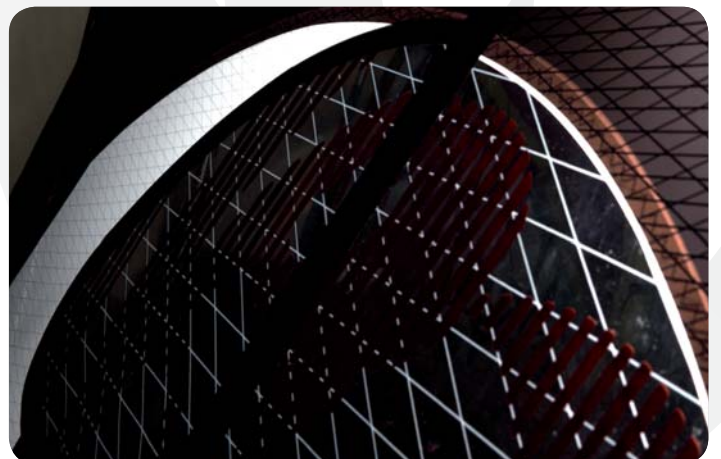

The new mast protector: extra reinforced and with new external up haul eyelet.

The full X-ply body creates a great heavy-duty support to keep the shape in the right place.

The PVC batten tensioner protector. Style and function.

New RRD top logo. Uncompromised distinctive look.
