

Wave Vogue MKIII

“Luxury top performance surf sail”

Program: Pure wave sideshore

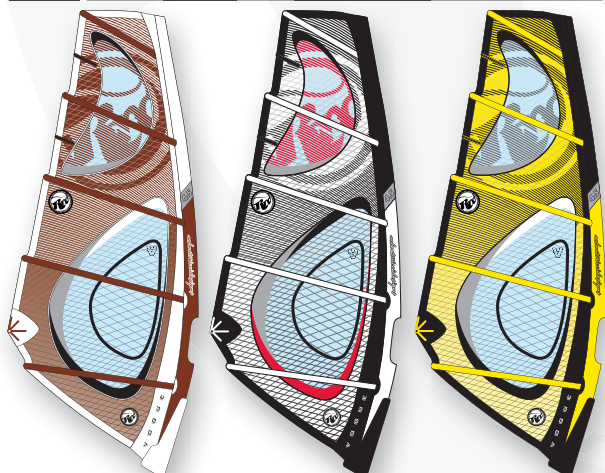

Sizes: 3.3 - 3.7 - 4.0 - 4.2 - 4.5 - 4.7 - 5.0 - 5.3 - 5.6

Re-designed with the help of wave specialist John Skye, the new wave vogue has been refined in both outline, window designs and overall shape. The bullet proof construction of this heavy-duty surf sail is achieved through the use of 3 different type of top quality x-ply materials in different weights/strengths for different areas of the sail. No compromise with cost effective panel layouts, only pure performance and top notch design oriented choices.

The Wave Vogue MKIII features:

The all X-ply body panelling plus tri-ply window of the Wave Vogue creates a surf sail with a combination of a smooth feel with ultimate durability. This smooth feel, combined with Pump-ability, a Focused Power Point and “quickly neutral” handling, makes the Wave Vogue the sail of choice for riders looking for top performance at the highest level in gnarly surf conditions. The Wave Vogue is also an excellent choice for lighter/smaller sailors in any conditions due to its short boom length and soft, forgiving handling. The outline and twist characteristics of the Wave Vogue make it feel lighter and turn tighter in the waves, and therefore ideal to perform in those unforgettable wave sessions.

Model	Boom (cms)	Luff (cms)	Battens	Recom. Boom	Recom. Mast	Head
Vogue 3.3	140	346	5	Wave Vogue 135-190	Vogue RDM C75 370	Adjust.
Vogue 3.7	144	375	5	Wave Vogue 135-190	Vogue RDM C75 370	Adjust.
Vogue 4.0	147	392	5	Wave Vogue 145-205	Vogue RDM C75 370	Adjust.
Vogue 4.2	154	393	5	Wave Vogue 145-205	Vogue RDM C75 370	Adjust.
Vogue 4.5	156	407	5	Wave Vogue 145-205	Vogue RDM C75 370	Fixed
Vogue 4.7	161	418	5	Wave Vogue 145-205	Vogue RDM C75 400	Fixed
Vogue 5.0	168	429	5	Wave Vogue 145-205	Vogue RDM C75 400	Fixed
Vogue 5.3	174	438	5	Wave Vogue 145-205	Vogue RDM C100 430	Fixed
Vogue 5.6	178	447	5	Wave Vogue 145-205	Vogue RDM C100 430	Fixed

The moderate aspect ratio outline of the wave vogue. Perfect balance for waveriding.

The top section of the sail is now lighter in weight, thanks to the use of an x-ply window.

The new window area made with two different x-ply materials.

The lower part of the sail, with heavy duty Dacron reinforcements are overlapped onto bullet proof x-plys.

The lower part of the sail, with heavy duty Dacron reinforcements are overlapped onto bullet proof x-plys.

The new incorporated mast protector allows the uphaul external attachment.

The batten ends PVC reinforcements. A sign of durability and RRD quality distinction.
